

CROWD EXCESS AGENT

Attention outruns evidence. Risk decides.

ALPACA PAPER OPTIONS

Markets can be loud. Evidence can be quiet.

The opportunity is the unexplained gap—not raw sentiment.

ATTENTION

moves first

CROWD EXCESS

EVIDENCE

explains—or fails to

The agent trades only when attention + price outrun objective news and every deterministic gate passes.

Three sources. Three distinct jobs.

Search attention is a proxy—not community sentiment.

03

OPENAI

Strict EvidenceAssessment only

Direction · materiality ·
confidence
Never contracts, size or orders

The trade is the residual—not the headline.

$$\text{CROWD EXCESS} = \text{SIGNED MOVE} \times \text{ATTENTION}$$

– NEWS DIRECTION × MATERIALITY × CONFIDENCE

POSITIVE

Upside enthusiasm looks excessive → bearish reversal candidate

NEGATIVE

Downside pessimism looks excessive → bullish reversal candidate

The model explains evidence. Deterministic code decides eligibility.

One screen makes the entire decision inspectable.
